

SAVE THE CISTE

Without the Coire na Ciste and West Wall Chairlifts, Cairn Gorm Mountain is no longer complete.

- **The West Wall Poma (WWP) leaves many - particularly families - unable to access the most extensive intermediate & advanced terrain.**
- **The WWP alone does not fully serve Coire na Ciste. Limits advanced terrain & can lead to long queues.**
- **Unacceptable lack of facilities in Coire na Ciste, with lengthy queues for the shuttle bus to Coire Cas.**
- **WWP is far less snow-sure than the runs it serves.**

REINSTATE THE CHAIRLIFTS

- **Easier and faster access to the mountain for all.**
- **Reduce congestion in Coire Cas.**
- **Reduce/remove shuttle bus queues and costs.**
- **Only the Chairlifts allow for lift-served summer activities.**
- **Only the West Wall Chairlift adequately serves the main Ciste runs.**
- **Mid-line loading on the Ciste Chairlift to replace the decommissioned Aonach Poma.**
